

Zero Expansion Candidate Questionnaire

- 1) I live close to the airport. A few years ago an airplane from Flying Cloud crashed on Beverly Drive, a few hundred yards from our home. If I looked at the expansion only from my perspective I would be against it. At the same time, the City has reached an agreement with the MAC to not try to block expansion under certain conditions. If elected, I will work to uphold both sides of that agreement.
- 2) If there were full knowledge then I would want the issue discussed fully and agreements reached.
- 3) I don't have enough information to respond to this question.
- 4) I want to see maximum security and believe the best way to achieve that security and consistency is through government regulation.
- 5) I don't have enough information to respond to this question.
- 6) I don't have enough information to respond to this question.
- 7) I would honor the agreement reached with the city.
- 8) If that were true then I would agree.
- 9) I would expect all legal and government regulations to be met and I await the results of the EIS.
- 10) I don't have enough information to respond to this question.
- 11) The City has a legal, contractual agreement with the MAC that both parties have pledged to uphold. In the agreement the MAC has agreed not to increase the pavement depth. As a member of the City Council I would work to ensure that all agreements are honored.
- 12) No. I favor more local transportation.
- 13) The two are related. Local businesses generate about 50% of property tax revenues in Eden Prairie. We have to learn to work with all of our community to partners so we never have to waste another \$880,000 taxpayer dollars because we weren't able to work together to address the needs of the community.
- 14) I think that endorsements based on like-minded values and beliefs are fine from any organization as long as they are principle based and are not intended to force certain ways of thinking and acting.
